Performance Summary

Is it Quick?

Needs Improvement. This site took little time to connect and deliver initial code. It began rendering content with considerable delay. There were 6 render-blocking requests. The largest content rendered later than ideal.

9 9 Pro 14

Is it Usable?

Needs Improvement. This site had good layout stability. It took some time to become interactive. It had 2 accessibility issues, none serious. Some HTML was generated after delivery, potentially delaying usability.

3 3 Pro 3

Is it Resilient?

Not bad... This site had no render-blocking 3rd party requests that could be a single point of failure. It had no security issues. Some HTML was generated after delivery, which can cause fragility.
